Yesely Love

We designed an outdoor patio with different comforting atmospheres to be able to enjoy all year around in the Texas weather. The circular flooring designed in the neck of the woods is surrounded by tall pine trees to delight a cup of coffee. A high-end outdoor kitchen with electric grill features, together with quartzites countertops, and custom made a swing out wall seats welcome guests for gathering. The aboveground swim endless pool spa allows you to exercise without the enormous cost and space requirements. The modern stainless ceilings and the outdoor shower is made with handmade hexagons, italian pebble stones and slim lines of porcelains. All the spaces are connected by travertine walkways and the outdoor led dimmable lighting contains different color schemes options to personalize different environments.
